There are six sections included in each lesson:

- 句子 Sentences
- 会话 Conversations
- 语法 Grammar
- 生词 New Words
- 替换与扩展 Substitution and Extension
- 练习 Exercises

Note: In classroom teaching, **New Words** are generally learned first. After the students have mastered the new words, we could proceed to the **Sentences**, **Conversations**, **Substitution and Extension** and finally **Exercises**. The teaching of **Grammar** is conducted through the whole process. Students who are self-taught can also follow this order.

To illustrate how to use this book, let's take Lesson 10 for example.

生词 New Words

The form, sound and meaning of a word should be learned by heart. Attention should be paid to the collocation of words. Students should use the new words to form phrases, or short sentences.

怎么去; 怎么走;
怎么学; 怎么做……

韩国离中国很近;
美国离中国很远……

(Thus, the new words 近 and 远 in this lesson are used in collocation. Also, students will learn how to use the word 离.)

操场前边;
百货大楼前边;
学校前边……

(The usage of nouns of locality is the grammar point of this lesson.)
